

Flexible silos are a lower cost solution for material storage to suit a wide range of spaces. Summit Systems Fabrications design and manufacture customised silo frames to hold any size flexible silo bags.

**Benefits**

- Breathable
- Excellent discharge behaviour
- Silos to suit most spaces
- Easy to install
- Low transport weight and cost
- No planning permission required
- Cost effective storage solution

Material Handling

Type	Length (mm)	Width (mm)	Height (mm)	Volume (m <sup>3</sup> )
2	1600	1600	2940	3.36
5	2260	2260	3450	8.13
8	2260	2260	4550	12.98
10	2540	2540	4840	17.54
12	2580	2580	5450	20.99
15	2880	2880	5680	25.05
17	3100	3100	5750	28.36
20*	3240	3240	6350	33.82
25	3350	3350	6650	42.79
30	4150	4150	6150	52.77
40	4350	4350	6800	67.09
50	5150	5150	6800	85.56

**Technical Specification**

- Length, width and height dimensions are for the silo steelwork support frame
- Volume based on ground clearance of 600mm
- \* Type 20 onwards are type 'RS' with suspension tubes and U bolts including shaping frame at silo hip
- Bespoke sizes are also available
- Silo steel framework manufactured from carbon steel powder coated to RAL7035
