

MAGNETIC PLATENS

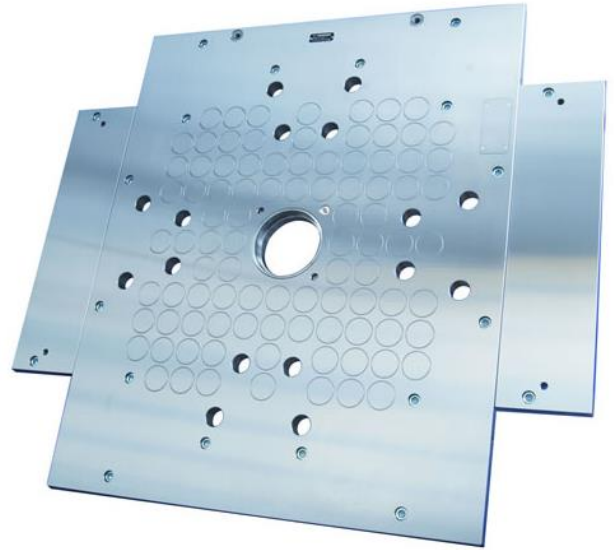

Rapid, safe and practical tool change in the injection moulding process.

Designed to meet the demands of a lean manufacturing process.

Remove and install a new tool in minutes, dramatically increasing production results.

Features

- No bolts or clamping required
- Boosts productivity and flexibility
- Easy and safe operation
- Versatile – can be installed on 99% of machines
- No wear on the tooling
- No flexing of the tool in production
- 37mm thickness, increased daylight
