

# FROM OCEAN TO OPPORTUNITY

**Did you know 8 million pieces of plastic makes its way into the ocean every day?**

Ocean Integrity have created a global waste management system, paying indigenous fishermen to collect and sort plastic pollution before it enters the ocean. This plastic is being processed and recycled into a usable, high quality material.

**Ocean recovered recycled LDPE**

**High performance polymer pellets**

**Can mitigate plastic packaging tax**

**Full traceability from collection to pellet**

**Contributes to a circular economy**

**Creates jobs for local fishermen**

**Produced in EUCertPlast accredited factory**

Partnering with Ocean Integrity enables your company to achieve ESG and CSR goals. This collaboration contributes to reducing the global carbon footprint, mitigates plastic impact, supports indigenous families and safeguards marine life.
